## **Difference Between Business and Profession**

1. A business is a kind of economic activity in which profit is earned by making or buying and selling certain goods to the customers.
2. However, in the profession, one needs to be highly skilled and specialized in a particular field in order to provide their services to the public.
3. The primary purpose of business is to make money. Understanding the needs of your customers and acting accordingly will spike up the sales.
4. In profession, the goal is to provide services for which a professional charge compensation, i.e., some amount of fee.
5. A business can be established anytime. What all it requires is the action from the entrepreneur. However, a profession works only if you are a member of a particular professional body and possess the certificate to practice your expertise.
6. Anyone is free to start a business. There are no particular educational criteria to be eligible for it.
7. However, in a profession, you are required to undergo prolonged training before you start to provide your services.
