Difference Between ExpressVPN and IPVanish VPN

1. It is indeed to be accepted that ExpressVPN is large, but IPVanish also offers the best services. The main difference between ExpressVPN and IPVanish is the speed, the ExpressVPN on an average can offer up to 160MBps across the globe while IPVanish can offer up to 100MBps.
2. The number of servers is also of a distinction to be noted. Express VPN has a mammoth 2000 server and more connect while IPVanish has a 1000 server network.
3. ExpressVPN has more than 148 server locations in 94 countries while IPVanish has servers located only in 60 countries.
4. In the case of simultaneous connection, Express VPN offers 5 at a time while IPVanish offers 10 connections at a time for an account.
5. Express VPN and IPVanish are named for security features but Express VPN stands ahead with privacy policy not being broken even once while IPVanish has already breached it once.
