Difference Between NordVPN and PureVPN

1. Both these VPN service providers are named for its quality and security, there are a few differences that make people opt for one over the other. The main difference between NordVPN and PureVPN is, the NordVPN has a better security feature than the Pure VPN with the former having SSTP and IPSec protocols offering double protection whereas the latter lacks the same.
2. NordVPN has server locations limited to 60 countries while PureVPN has server locations almost all over the world, whopping 140 plus countries.
3. The number of servers that the VPN service provider has also given clarity on the service. NordVPN has more than 5200 servers while Pure VPN has 2000 servers across the world.
4. NordVPN has streamlined price plans when compared to Pure VPN. The pricing factor is for Nord VPN is less when compared to the Pure VPN. More importantly, the money-back guarantee differs from each other; Nord VPN offers 30 days money back while Pure VPN offers 7 days.
5. The difference comes about the ease of use now, as such Nord VPN does not have streaming issues and the quality of the connection is pretty good while Pure VPN has speed issues, it
